

Apply TrueSkillThroughTime algo on 7660 games:

Calibration plot on 7660 games:

The calibration plot on the entire 7660 games dataset is very similar to the algo applied on the entire 25651 boxing matches.

Game Network Graph:

Draw a game graph with the entire dataset. The nodes are players and edges are if they have played against each other, the edge weight is the count of games between each node.

We use the entire data of 7660 games.

There are 4896 nodes in the graph, and there are 23 clusters(communities) detected.
